

Enrichments' Descriptions

Ballet: This class will provide an opportunity for children to learn basic ballet techniques, beginning ballet postures, and simple dance skills. Ballet vocabulary and stretching will be taught. All will be showcased with amazing costumes in a recital at the end of the school year.

Gymnastics: Children will learn the basic movements, eye-hand coordination, gross motor skills and balance skills. In addition to floor work, equipment will include balance beams, rollers, inclines, mini-tramp and parachutes.

Just Dance! This class will include basic hip hop steps and choreography to a variety of upbeat, age-appropriate music. This is a great way to have a lot of fun moving and grooving.

Little Chefs: With the teacher's help, our little chefs will measure, stir, mix, and sort ingredients as they enjoy their time creating and tasting different types of cuisine each week. It's a great class for picky eaters to try new things they create themselves.

Little Scientists: A hands-on, child friendly approach to the FUNDamentals of Science will be taught. You will be delighted by your little scientist's enthusiastic descriptions of the projects that he/she will bring home.

Soccer: In addition to the basics of soccer, this class will be focusing on children's gross motor skills, while giving them the fundamentals of belonging to a team in a noncompetitive atmosphere.

We Got Rhythm: In this class the teacher will demonstrate how rhythm is natural in everyone including children. Students will learn and experiment with musical instruments, such as percussion, guitar, and keyboard. They will also have their first introduction to vocal techniques while exploring musical genres.

Enrichments Session 2 - November 7, 2016 - February 17, 2017

Child's Name: _____ Teachers' Name: _____

Monday: We Got Rhythm
